**CASES DIAGNOSED IN 2006-2013\***

**Submission:** *November 2015*

**Follow-up Cutoff Date:** *December 31, 2018*

**Documentation Version:** *January 2021*

**Diagnosis Years:** *2006-2013\**

\*This dataset is restricted to persons who were diagnosed with a tumor between 2006-2013 based on the November 2015 SEER submission. If an included person had prior tumor diagnoses (e.g., between 1975-2005) as reported to SEER, then the information for these prior tumor diagnoses are also included in this dataset.

### SEQUENCE NUMBER

**NAACCR Item #:** 380

**SAS Variable Name:** Sequence\_number

*Field Description:* Sequence Number-Central describes the number and sequence of all reportable malignant, in situ, benign, and borderline primary tumors, which occur over the lifetime of a patient. The sequence number may change over the lifetime of the patient. If an individual previously diagnosed with a single reportable malignant neoplasm is subsequently diagnosed with a second reportable malignant neoplasm, the sequence code for the first neoplasm changes from 00 to 01.

This sequence number counts all tumors that were reportable in the year they were diagnosed even if the tumors occurred before the registry existed, or before the registry participated in the SEER Program. The purpose of sequencing based on the patient's *lifetime* is to truly identify the patients for survival analysis who only had one malignant primary in their lifetimes.

### In Situ/Malignant as Federally Required based on Diagnosis Year

Code	Description
00	One primary only in the patient's lifetime
01	First of two or more primaries
02	Second of two or more primaries
..	(Actual number of this primary)
59	Fifty-ninth of fifty-nine or more primaries
99	Unspecified or unknown sequence number of Federally required in situ or malignant tumors. Sequence number 99 can be used if there is a malignant tumor and its sequence number is unknown. (If there is known to be more than one malignant tumor, then the tumors must be sequenced.)

(continued on next page)

---

## FIELD DESCRIPTIONS

---

(continued from Sequence Number)

### Non-malignant Tumor as Federally Required based on Diagnosis Year

---

Code	Description
60	Only one non-malignant tumor or central registry-defined neoplasm
61	First of two or more non-malignant tumors or central registry-defined neoplasms
62	Second of two or more non-malignant tumors or central registry-defined neoplasms
..	..
87	Twenty-seventh of twenty-seven
88	Unspecified or unknown sequence number of non-malignant tumor or central-registry defined neoplasms. (Sequence number 88 can be used if there is a non-malignant tumor and its sequence number is unknown. If there is known to be more than one non-malignant tumor, then the tumors must be sequenced.)

### PRIMARY SITE

**NAACCR Item #: 400**

**SAS Variable Name: Primary\_Site**

*Field Description:* This data item identifies the site in which the primary tumor originated. See the *International Classification of Diseases for Oncology*, Third Edition (ICD-O-3) for topography codes. The decimal point is eliminated.

Cases diagnosed 1977-1991 were coded using the *International Classification of Diseases for Oncology*, 1976 Edition (ICD-O-1976). Prior to 1977 diagnoses, cases were coded using the *Manual of Tumor Nomenclature and Coding*, 1968 (MOTNAC).

All cases 1975-1991 were machine-converted to ICD-O-2 codes without complete hand review.

---

## FIELD DESCRIPTIONS

---

### LATERALITY

**NAACCR Item #: 410**

**SAS Variable Name: Laterality**

*Field Description:* Laterality describes the side of a paired organ or side of the body on which the reportable tumor originated. Starting with cases diagnosed January 1, 2004 and later, laterality is coded for select invasive, benign, and borderline primary intracranial and CNS tumors.

See <http://seer.cancer.gov/manuals/primsite.laterality.pdf> for a list of sites for which SEER requires information on laterality.

---

Code	Description
0	Not a paired site
1	Right: origin of primary
2	Left: origin of primary
3	Only one side involved, right or left origin unspecified
4	Bilateral involvement, lateral origin unknown; stated to be single primary <ul style="list-style-type: none"><li>• Both ovaries involved simultaneously, single histology</li><li>• Bilateral retinoblastomas</li><li>• Bilateral Wilms's tumors</li></ul>
5	Paired site: midline tumor
9	Paired site, but no information concerning laterality; midline tumor

### HISTOLOGY ICD-O-2

**NAACCR Item #: 420**

**SAS Variable Name: Histology\_ICD\_O\_2**

*Field Description:* NOTE: ALL CASES DIAGNOSED 1975-91 HAVE BEEN CONVERTED TO THE *INTERNATIONAL CLASSIFICATION OF DISEASES FOR ONCOLOGY*, SECOND EDITION (ICD-O-2, 1992).

The SEER program has used several different, but related, coding systems for morphology over time. One should be extremely careful when doing any analysis of trends related to morphology. It is suggested that these analyses start with diagnoses no earlier than 1977 and that special attention be paid to the changes for 1986-91 cases due to the use of the *International Classification of Disease for Oncology, Field Trial Edition, March 1988* and for 1992+ cases due to the use of ICD-O-2.

Analyses of morphology data are usually limited to microscopically confirmed cases only.

(Continued on next page)

## FIELD DESCRIPTIONS

(Continued from HISTOLOGY ICD-O-2)

### HISTOLOGY CODING

#### FOR CASES DIAGNOSED 1975-85:

Histologic types are defined in the morphology section of the *International Classification of Diseases for Oncology*, 1976 Edition (ICD-O, 1976). However prior to the introduction of ICD-O, 1976, morphology was coded using the *Manual of Tumor Nomenclature and Coding*, 1968 (MOTNAC). With the introduction of ICD-O, 1976, all cases previously coded using MOTNAC were machine converted without hand review using the conversion table, *Conversion of Morphology Sections (neoplasms) of 1968 Manual of Tumor Nomenclature and Coding (MOTNAC) and 1965 Systematized Nomenclature of Pathology (SNOP) to 1976 International Classification of Diseases for Oncology*, developed by Constance Percy. The morphology codes of ICD-O, 1976, are more specific than those of MOTNAC. Thus, less detailed information on morphology is available for cases diagnosed 1975-76. For example, when using MOTNAC large cell carcinoma is included with carcinoma, not otherwise specified (NOS); when using ICD-O, 1976, large cell carcinoma is a separate entity having its own code. All have been machine converted to ICD-O-2.

#### FOR CASES DIAGNOSED 1975-85:

8524/3	Intraductal carcinoma and lobular carcinoma
8522/2	Intraductal carcinoma and lobular carcinoma in situ
8543/3	Paget's disease with intraductal carcinoma

#### All sites — Introduced for coding in approximately 1982

Code	Description
9616/3	Lennert's lymphoma
9624/3	Malignant lymphoma, large cell, cleaved, diffuse
9634/3	Malignant lymphoma, large cell, non-cleaved, diffuse

## FIELD DESCRIPTIONS

---

(Continued from HISTOLOGY ICD-O-2)

### FOR CASES DIAGNOSED 1986-91:

Histologic types are defined in the morphology section of the *International Classification of Diseases for Oncology, Field Trial Edition, 1986* (ICD-O FT). (This volume is no longer available. It was replaced by the *International Classification of Diseases for Oncology, Field Trial Edition, March 1988* (ICD-O FT 1988). Pages i-vi, 23 of the latter volume list the differences between the two Field Trials, present a summary of the changes to ICD-O, 1976, and define the symbols used in the morphology section. These were converted to ICD-O-2.

### FOR CASES DIAGNOSED 1992-2000:

Histologic types are defined in the morphology section of ICD-O-2. See pages 137+ in ICD-O-2 for additions and changes.

### FOR CASES DIAGNOSED AFTER 2000:

All cases diagnosed after 2000 were converted from ICD-O-3 to ICD-O-2.

---

## BEHAVIOR CODE ICD-O-2

**NAACCR Item #: 430**

**SAS Variable Name: Behavior\_code\_ICD\_O\_2**

*Field Description:* Behavior codes are also defined in ICD-O-2, 1992.

Note: For bladder only, all in situs (/2) are converted to invasives (/3) before inclusion on this file.

Cervix in situ not required.

### FOR CASES DIAGNOSED AFTER 2000:

All cases diagnosed after 2000 were converted from ICD-O-3 to ICD-O-2.

---

## HISTOLOGIC TYPE ICD-O-3

**NAACCR Item #: 522**

**SAS Variable Name: Histologic\_Type\_ICD\_O\_3**

*Field Description:* The data item Histologic Type describes the microscopic composition of cells and/or tissue for a specific primary. The tumor type or histology is a basis for staging and determination of treatment options. It affects the prognosis and course of the disease. The *International Classification of Diseases for Oncology, Third Edition* (ICD-O-3) is the standard reference for coding the histology for tumors diagnosed in 2001 and later.

All ICD-O-2 histologies for 1975-2000 were converted to ICD-O-3.

**SAS Variable Name: Behavior\_code\_ICD\_O\_3**

*Field Description:* SEER requires registries to collect malignancies with in situ /2 and malignant /3 behavior codes as described in ICD-O-3. SEER requires registries to collect benign /0 and borderline /1 intracranial and CNS tumors for cases diagnosed on or after 1/1/2004. Behavior is the fifth digit of the morphology code after the slash (/). See ICD-O-3 (page 66) for a discussion of the behavior code.

Code	Description
0	Benign (Reportable for intracranial and CNS sites only)
1	Uncertain whether benign or malignant, borderline malignancy, low malignant potential, and uncertain malignant potential (Reportable for intracranial and CNS sites only)
2	Carcinoma in situ; intraepithelial; noninfiltrating; noninvasive
3	Malignant, primary site (invasive)

All ICD-O-2 behaviors for 1975-2000 were converted to ICD-O-3.

In the early 1980's, additional codes specifying T-cell, B-cell, or null cell involvement in lymphomas and leukemias (histologies M9590-9940) were introduced by SEER. Because the reporting requirements and medical terminology have changed over time, care should be exercised when analyzing this information.

Code	Description

2	Grade II; grade ii; grade 2; moderately differentiated; moderately differentiated; intermediate differentiation
3	Grade III; grade iii; grade 3; poorly differentiated; differentiated

6	B-cell; Pre-B; B-Precursor
7	Null cell; Non T-non B;
8	N K cell (natural killer cell)

### SEER HISTORIC STAGE A (1973-2015)

NAACCR Item #: N/A

SAS Variable Name: SEER\_historic\_stage\_A\_1973\_2015

*Field Description:* Derived from Collaborative Stage (CS) for 2004-2015 and Extent of Disease (EOD) from 1973-2003. It is a simplified version of stage: in situ, localized, regional, distant, & unknown. Over time several different EOD schemes have been used. Thus caution should be used when doing trend analysis.

For more information including sites and years for which it isn't calculated, see <http://seer.cancer.gov/seerstat/variables/seer/lrd-stage>.

Code	Description
0	In situ — A noninvasive neoplasm; a tumor which has not penetrated the basement membrane nor extended beyond the epithelial tissue. Some synonyms are intraepithelial (confined to epithelial tissue), noninvasive and noninfiltrating.
1	Localized — An invasive neoplasm confined entirely to the organ of origin. It may include intraluminal extension where specified. For example for colon, intraluminal extension limited to immediately contiguous segments of the large bowel is localized, if no lymph nodes are involved. Localized may exclude invasion of the serosa because of the poor survival of the patient once the serosa is invaded.
2	Regional — A neoplasm that has extended 1) beyond the limits of the organ of origin directly into surrounding organs or tissues; 2) into regional lymph nodes by way of the lymphatic system; or 3) by a combination of extension and regional lymph nodes.
4	Distant — A neoplasm that has spread to parts of the body remote from the primary tumor either by direct extension or by discontinuous metastasis (e.g., implantation or seeding) to distant organs, tissues, or via the lymphatic system to distant lymph nodes.
8	Localized/Regional – Only used for Prostate cases.
9	Unstaged — Information is not sufficient to assign a stage.
	Blank

### CENSUS TRACT POVERTY INDICATOR

**NAACCR Item #: 145**

**SAS Variable Name: Census\_Tract\_Poverty\_Indicator**

*Field Description:* Assigns a code for neighborhood poverty level based on the census tract of diagnosis address. Cases diagnosed between 1995 and 2004 are assigned a code based on the 2000 U.S. Census, the last decennial census for which poverty level was collected. Cases diagnosed since 2005 are assigned a code based on the American Community Survey (ACS).

The ACS publishes tract-level poverty data annually, on a rolling five-year window, with a two-year lag (e.g., poverty data for 2006-2010 will be available in 2012). Cases for a given diagnosis year are initially coded using the most recent file available when the cancer data are first released, and the item is subsequently coded using the ACS file centered on the year of diagnosis. For example, cases diagnosed in 2012 will initially be coded using the 2008-2012 ACS file, and two years later using the 2010-2014 ACS file. An exception to this rule is that cases diagnosed in 2005 and 2006 will be coded using the 2005-2009 ACS file, because this was the first such file released. Codes may be automatically assigned by running the Poverty and Census Tract Linkage Program available through the Data Analysis Tools section of the NAACCR website.

Code	Description
1	0% - <5% poverty
2	5% - <10% poverty
3	10% - <20% poverty
4	20% - 100% poverty
9	Unknown or not applicable

*Field Description:* The Rural-Urban Continuum (1993) codes (usually known as the Beale Codes) separate counties into four metropolitan and six non-metropolitan categories, based on the size their populations and form a classification scheme that distinguishes metropolitan counties by size and non-metropolitan counties by degree of urbanization and proximity to metro areas.

These codes can be derived electronically, using patients' state and county at diagnosis, so registrars do not need to provide them. FIPS state and county code mappings to Beale Codes can be obtained in an Excel file at <http://www.ers.usda.gov/data-products/rural-urban-continuum-codes.aspx>
